Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record neither shows nor suggests a projection system comprising all of the elements of claim 1, in combination, and particularly: "a green light filter for reflecting a part of green light of a plurality of intermediate light fluxes dividedly outputted from the FEL and passing remaining light" such that green light is filtered out from the incident polarization light prior to reaching the remainder of the projection system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Haven et al. U.S. Patent 6,739,723 B1 teaches a polarization recapture system for liquid crystal-based data projectors.

Zeinali U.S. Patent 5,868,480 teaches an image projection apparatus for producing an image supplied by parallel transmitted color light.

Hamada et al. JP 07-072450 teaches a projection display device.

Kodama et al. JP 2000-347292 teaches a display device.
